Letter of Appreciation

Construction of Suki Sushi Centre at Tai Seng Street

Jian Huang was appointed as Design-and-Build contractor for the project. We are very pleased that they have handed over to us a well-designed building which incorporates the features of value engineering of basement carpark and structural systems.

The Suki Sushi Centre is our corporate head office as well as Centralized Kitchen to support our outlets in Singapore. The building was completed well on-time and Jian Huang achieved a good safety record during the construction period.

We maintained close interaction with Jian Huang throughout the construction period. They understand our requirements very well and were receptive to our requests on design changes. We are impressed and grateful for their professionalism and dedication in completing the Suki Sushi Centre, which is the showpiece of our organization.

Yours faithfully,

KELVIN ONG

Director
